

figs Ants and next specie The figs flower flying Ants, (fi & fl & fl and it's positive, symmetric, logic evolution explained.)

If The Figs Tree's where not in the Jungle's, Jungle's had \pm 80% less Living Alpha's inside them.

$\{\{fi\}_=_\{\{figs\}\{Ants\}\}\}$

the Figs Ant who had & still have and always will have fi work packet:

"spread: "the figs seeds wisely for next $\{\{first\}\{seed\}\{of\}\{a\}\{new\}\{fig\}\{tree\}\}_=_\{\{Little\}\{Brain\}\{of\}\{a\}\{plant\}\}."$

Somewhere in the past the Figs Tree reduced in population because the figs flower stead closed flower and opened there flowers after the nectar had reached end of the figs flower nectar fertility.

The GOD of figs came back to earth with his second insurance: $\{\{\{\{fi\}_\&\{\{fl\}_\&\{\{fl\}\}\}_=_\{\{\{figs\}\}\{\{flowers\}\}\}\{\{flying\}\}\{\{Ants\}\}\}\}$

And the $\{\{fi\}_=_\{\{figs\}\}\{\{Ants\}\}\}$ gave born to next evolutionary specie: $\{\{\{figs\}\}\{\{flowers\}\}\}\{\{flying\}\}\{\{Ants\}\}\}$

who had and have perfect & 100% not mutant alpha cell & by belonging body to do there $\{\{\{fi\}_\&\{fl\}\}\}\{\{work\}\}\{\{packet\}\}\}_=_$

$\{\{Enter\}\{the\}\{closed\}\{white\}\{flower\}\{of\}\{figs\}\{tree's\}\{and\}\{take\}\{fertility\}\{figs\}\{blossoms\}\{Nectar\}\{\&\}\{bring\}\{it\}\{into\}\{an\}\{other\}\{figs\}\{tree\}\{it's\}\{fertility\}\{flowers\}\{loop\}\{\{\{fi\}_\&\{fl\}\}\}\{\{work\}\}\{\{packet\}\}\}$ for infinity time period}. So let's redeploy the in

Latin's biology standing term: $\{\{\{\{figs\}\}\{\{wasp}\}\},\}_=_\{\{fi\}_\{But\}_\{Not\}\{fl\}\}$ and Latin's biology has definition of the word wasp negative evolution outcome of the 100% positive, symmetric & vegetarian species: "flower bee's."

So figs wasp is now figs flowers flying Ants. First prove: (Logic evolution next specie after figs Ants (the figs flowers flying Ants) are family with next work packet witch is straight the next extension of figs ants work packet), In this documents this is explained with It's GOD The Creator of figs $\{fi\}$ insurance One & the 100%

must and is perfect figs insurance Two $\{fi\}_\&\{fl\}_\&\{fl\}$. Second prove: (That figs flowers flying Ants are no wasps) If you take a figs ant on your point finger and place it between your eye and the sun light you see a

transparency and model, If you do the same check with figs flowers flying Ant you see transparency and logic next model as the behind parents: "figs ants."

a figs Ant

Insurance 2,figsflowersflying Ant. A Positive symmetric Bee. Negative Evolution Wasp. Insurance 2 Bee's & Flowers.
