

Hell March Code: "Toxic Oxidation Process By Mix Of Phosphorus & Chlorine."

When Period Element 15 P Phosphorus & Period Element 17 Cl Chlorine are mixed the revolving reaction is an oxidation what has as result single or multiple P_x-Cl_x Binding, P Phosphorus & Cl Chlorine are 2 of the 11 Brick stones Human D.N.A./R.N.A. so the are not Toxic but the oxidation process is Toxic & can occur Psychotics, Head age & Miscibility, Warning because the most clean water pipelines serves $H_2O_{(Water)}$ what contains $Cl_{(Chloride)}$, when a Human take a shower with: "Chlorine holding Water" & "Soap with Phosphorus" He or she breath the Toxic oxidation is than Poisoned and in the situation where a Washing machine stand in a building whit out solid vapour extraction and use Chlorine holding Water mixed with Phosphorus holding Soap then all People inside the rooms filled with the vapour breath the Toxic oxidation and are so to consider as Poisoned, so Washing your body needs to be done with out Phosphorus. I advise the following commandments: "To Wash your body with: "Salt $(Chlorine \& Sodium)$ " & "Cleaning Chloride $(1000x \text{ less corrosive then pure Chloride})$." & to place the Washing machine outside the Building.

From a several age all most all humans know that Green Soap May not been mixed with Chlorine revolved out of Educated Ritual but almost no one looked into science what for elements there are in Green soap what is may not be mixed with Chlorine and what the scientific result are!

Yours faithfully and based on passive suffrage Marshal I remain in the status of doctrine,

Dutch Civilian on standby Lieutenant: [Marcel Alexander Roelfszema](http://www.uniquation.world),
