

Mission Acquisition Fungus Step 6:

"Instead of Fungus Infected Grain as food for Meat, Milk & Egg producing animals serve those on top of Fungus Free Rice, Mix of Fungus Free Beans."

Cancer tumours are phenomenal to compare with truffles that revolved out of fungus traces.

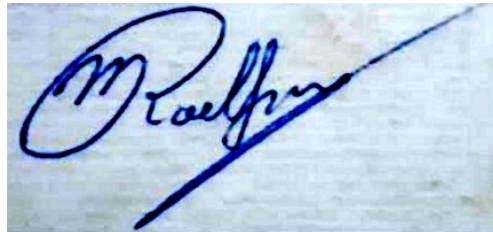

So we may not consume fungus and fungus traces.

Much food contains fungus traces this we got to annulated to do this in mission acquisition fungus.

Mission Acquisition Fungus Step 6:

All Grain to consider as Fungus Infected because of that the: "Meat, Milk & Egg production" is infected with Fungus to so instead of: "Fungus Infected Grain as Food" for: "Meat, Milk & Egg producing animals" serve those on top of Fungus Free Rice: "A Mix of Fungus Free Beans for the: "Necessary Amino Acids & Proteins."

Yours,

[Marcel Alexander Roelfszema,](#)
