

Hell March Code: Propylene Glycol from temperature 188.2° Celsius = Toxic = S13 = E.M.

Consume of Propylene Oxide = Toxic & Occurs Propylene Oxide Glycol-D.N.A. Cancer.

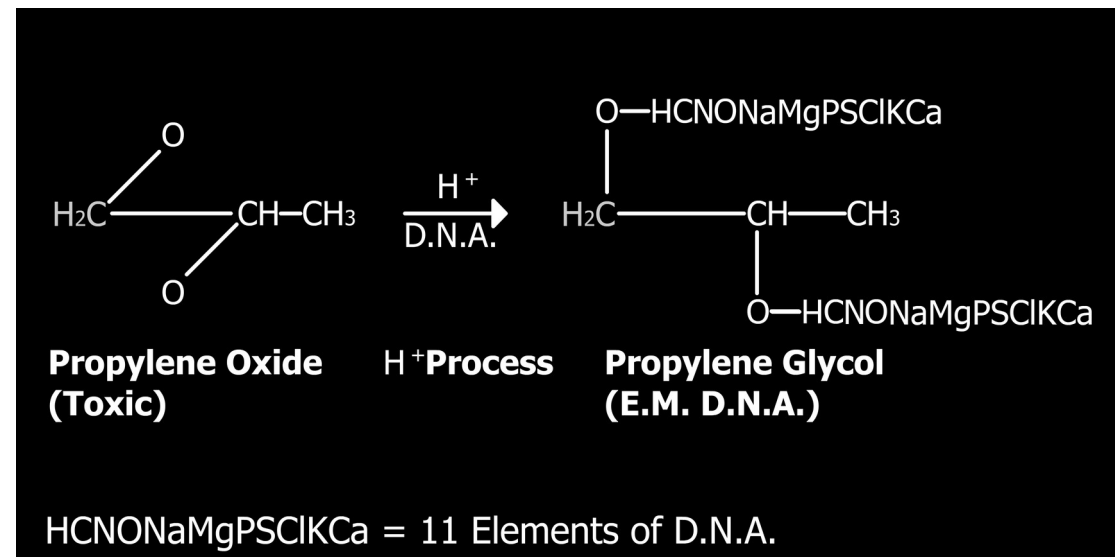

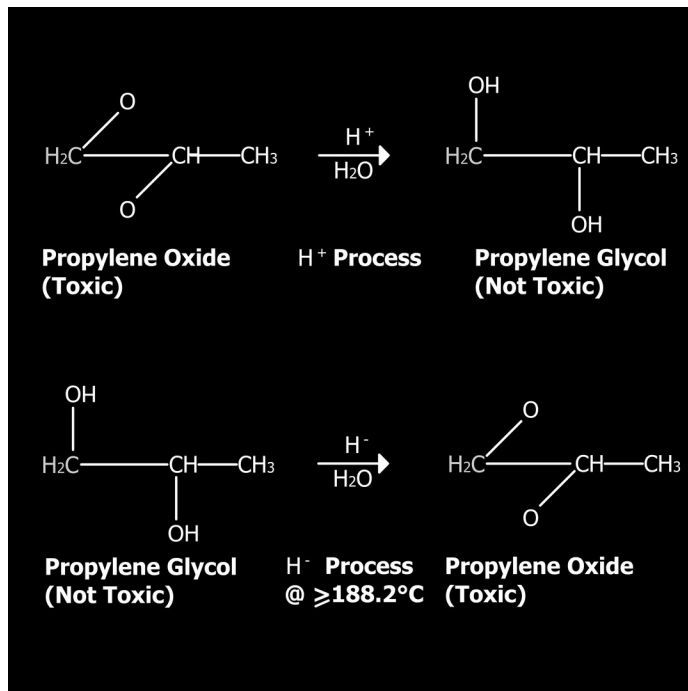

Consumption with includes the ingredient: "Propylene Glycol,"

May not become hotter than 188.2°Celsius* other wise the Propylene Glycol is brought back to Propylene Oxide & After consume of Propylene Oxide the

H⁺ Process takes place inside a body and can take the H element of D.N.A.

& occurs Propylene Oxide Glycol-D.N.A. Cancer.

& Propylene Glycol to consider as Alcohol Family.

* Boiling Temperature of Propylene Glycol. In name of
