

9th Type of Sugar = xelose

xelose = Vegetarian Sugar [That's the main reason for 9th Type of Sugar].

1 important columns under the 9th Type of Sugar is:

Woodtose:

- Woodtose sugar found inside D.N.A. of wood, to write as:
- Latin name of type of wood / Latin name of tree + bone connected xelose.

To sort all found woodtose into 2 columns:

Moult Hard woodtose &

Moult Soft woodtose.

So that we can look inside this columns what's wood we can use to bake bread out of.

And column Moult Hard Woodtose extended with 2 Numbers:

- {x}% pro 100 gram swallowed type of woodtose at which {x} is the amount of descaling a pineapple measured @ the age of 8 year &
- {y}% pro 100 gram swallowed type of woodtose at which {y} is the amount of descaling a pineapple measured @ the age of 26 year.

Under the age of 8 years do not feed and do not consume any type of woodtose.

For in calculation {x} & {y} is research into zoom level 1×10^{-9} meter necessary.

Explanation Mission: "Woodtose with a place in Jasesa time period":

1 Human D.N.A. Brick stone contains 1920 Dextrose Ribose Because of communication law between 2 Dextrose Ribose can only be realized with equal shuttle's so the amount of 1920 D.R. can go to the part of 2 so that we got to find & sort: "960 different woodtose" to mix them into: {{Mix of 960 Types Woodtose}{sugar bags}}, they must be continued available & payable surround the globe in a church pro group of 30.000 inhabit people rewired to there sugar church.

The easiest wood to make wood-flour is wood from the Popular tree.
