

Bleu Alg = Cyanobacteria

## Evolution Theory Neon Saturn:

This Planet Vibrated From North Pole To South Pole & From South Pole To North Pole in 2 Seasons With Occur That North Side Of The Planet Where Placed All Red Alg's & South Side Of The Planet Where Placed All Green Alg's & All Bleu Alg Where Vibrated Into The Vacuum, The 90 Degrees Different Movements Gave The Planet Mountains In Form Of Planetary Width Circles, Now A day The Fountains Have Spread Water Into North Red Alg's Rivers & South Green Alg's Rivers & In The Middle Off Neon Saturn An Ocean With Mixed Live Formed From A Mix Of Red & Green With Mix Result: "Yellow Alg's" (So As Live Really Mend To Be).

Bleu Alg Is Necessary For Generating White Alg Somewhere In It's Future.
