

Formulas Recipe: "Jasesa Bread:"

Formulas Recipe Jasesa Bread comes only with the change of the ingredients off all Grain Bread. The Formulas of God's-Kingdome Bread comes with a handle of baker ship called Un-Sulfur Bread Dough. Most Mould infection inside Grain is rewired to the Period Element #16 S Sulfur.

3 Main Brick-Stones of Vegetarian Grain are:

Period Element #15	P	Phosphorus;
Period Element #16	S	Sulfur; &
Period Element #19	K	Potassium.

To consider loose floating P, S & K as Oxide process Revolving Periodic Elements.

So we must pollinate a Mother Grain specie with a Father Grain Specie who bare Son Grain

The Son Grain Specie must bare Jasesa Grain*

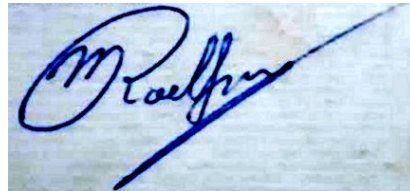

* Jasesa Grain = Grain without loose Floating Periodic Elements P. S & K in the Seed of the Son Grain.

Mother Grain, Father Grain & Son Grain must be 3 Mould-Hard-Grains**

** Mould-Hard-Grain is the Grain plant who its carrot sweat Mould infection back into the Sand.

So Jasesa Bread must have the ingredients Jasesa Grain*

The Rest of Recipe Jasesa Bread is same as the Written Recipe Breads.

M.A. (Beaker) Roelfszema
