

Saturated Fats Rewired To Magnetic Periodic Elements & Occurring tRNA, mRNA & DNA Mutations.

Now a day in cancer world doctor's explain to there client's that a "DNA Mutation" has it's location because the amount of feeding blood.

If you think further you end with this conclusion:
"That before the mutation exist it has intelligently."

This is false because:

Before something exist it has no intelligently otherwise it already existed!

The true is that surround the location of a: "DNA Mutation" vain come together or a vain is there splitting in multiple vain, it is here where a more worth of saturated fats is stocking, this occurs a stocking of: "Magnetic Periodic Elements" in the same location as the fats, The building up of Gauss will reach an overload and is shorted to the:
"3 Gauss sided protection pro 2 DNA Cells" after this occurs the Ohm of 2 DNA Cells is defect, a healthy DNA String will fall apart an is broken then cell repair start on a several moment the in calculators to calculate in the code of the missing DNA parts, but the in calculators are calculating in a Gauss shorted situation, the incalculators will calculate mutated codes, and when those mutated codes are physical resurrected the thirst mutation (Cancer) is then there, a DNA Cell who is mutated and gone starts it's incalculator for in calculation of the next body particle in the D.N.A. String, will calculate definitive a mutated D.N.A. cell.
