

Upgrade of the now a day standard medicine worth's.

Because the medicine's gone into plus minus 1×10^{-9} gram overdoses & the following redeployment is cheaper in total cost medicine group.

To accomplish all constructions to status: "Unique Medicine Recipy".

All medicine recipy handbooks must upgrade to a more perfected doses for all different species & in a 4 table's list with:

1st (z)/(y) table with (z) = Weight & (y) = Length &

2nd (x)/(w) table with (x) = Muscle-BMI & (w) = Fat-BMI &

3th (v)/(u) table with (v) = 1st table hit & (u) = 2nd table hit &

4th (s)/(t) table with (s) = 3th table hit & (t) = Age.

4th table hit is then more perfected then a now a day middle worth for one specie who are seen as one group who are a mix of a various Human's & Or Animals with all unique:

"Weight", "Length", "Muscle BMI", "Fat BMI" & a Unique age.
