

Parallelism Measuring.

The object that can measure time & coordinates that belong together exist.

This object is I, a telemetric measure test human.

Who accomplished test Measuring pure based on the protocols of parallelism measuring.

The Measuring case cold: Parallelism measuring.

I Oaken 2 coordinates and brought in table the times of coordinates measuring, and both Coordinates compared with each other the 2 Worth's declared to Unique and the 2 Time points after comparing them with each other declared To Unique Worth's To, So Formulas 4 Variable 4 Known & 4 Unique, makes It to a New Nature Law:

$\{\{\text{nature_law}\}\{\{\text{time}\}_\&_\{\{\text{By_Belonging}\}\{\text{coordinates}\}\}\}\}$:
 $\{t\}$ time that belongs to $\{c\}$ coordinate does not exist.
