

Mission Name: Global Heat Release into Space With 8 Space Elevators.

Start

All Periodic Elements Want to be in 1000 Pascal-Zone.

The deeper Periodic Element The more Hotter.

Epic Centre Mother Earth Shoot be 5555°C ,

Epic Centre Mother Earth Cooled Down at least 345°C ,

$5555^{\circ}\text{C} - 345^{\circ}\text{C} = <5210^{\circ}\text{C}$,

345°C Upwards to 1000 Pascal-Zone.

We need to bring the Extra Heat in 1000 Pascal -Zone into (Space),

(Space) is The Vacuum Part of The Universe, Code Universe = Heal all.

Prepare launches of The 8 Space Elevators on 8 coordinates on Planet Earth

Mission Name: Global Heat Release into Space With 8 Space Elevators.

* Place Heat out of 1000 Pascal Zone in An Object what contains Heat Plasma,

Send Object with it's Plasma Heat-Isolated into Space,

If Object is in Space Than Open Object's Heat- Isolation to release the heat in Space,

Bring the Object with Cold Plasma back to 1000 Pascal-Zone & Go Back to *.

End Never
