

## To Short on Teachers then need Upper Didactic Educate Under Didactic.

When the problem is to short on teachers then we need to arrange that:

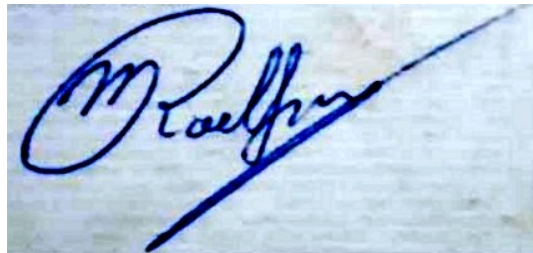

Upper Didactic Gone educate Under Didactic whit 1 Year Difference

So will all reports made in 1 education year before and upgraded within a year to a final edition report and numbered with the highest score for a Final Report can be great education material for the pupils who study in class one year before that of the Higher Didactical Student Teacher.

A solution for the problem to short on teachers mixed with the problem that students are uninformed about the possibilities of future Studies & the bi be longing revolving functionaries can be the Formulas: "Class Functionary," where a Professionals Functionaries need to stand for the Class to inform the Pupils of there Duty bi be longing to there Functionary and inform them about the possibilities of the Necessarily Learning Way's.

And if CORVID 19 Immunity is arranged for older people, explicit people with Raw we can present:

"Class Granddaddy & Class Grandmother," because the best remedy against Raw is those with Raw to give them the possibilities to Colour in the Live of Youth.
