

The Need for Computer Controlling Software Specialized For Kids.

The International Telemetric Law say's that al internet communications before connection is realized need to be handshake from both directions & that all internet communication with one or both of the side's of the connection have an under Age of 18 non adult status, it is than that there handshake I/O need to be supervised by someone of the child it's parenthood. In Germany Only 10% of there parenthood is controlling the handshake I/O correct for there children, to score a 100% PEGI protection we need Computer Controlling Software Specialized for Kids as:

- Windows Kids;
- Linux Kids;
- IPhone Kids;
- Android Kids;
- Marshmallow Kids;
- Server Kids; &
- World Wide Web Kids, Etcetera.
